

Last week, I met with the members of the 10th District Environment Advisory Board. Comprised of regional leaders in the environmental community, the board discusses pressing issues facing the 10th District, Illinois and the nation. Together, we successfully fought BP's plan to dump more pollution in our lake last year and introduced legislation to ban sewage dumping in the Great Lakes.

Among the topics we discussed were the need for a comprehensive regional plan for Great Lakes protection, the enhanced wetland expansion at the Buffalo Creek Reservoir and our efforts to clean Waukegan Harbor.

10th District Environmental Alliance Advisory Board Lakes looks on as Congressman Kirk meets with
